Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species I, claims 11, 12, 14-22, 24 and 26, in the reply filed on 27 July 2005 is acknowledged.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11, 12, 14-22, 24 and 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sayyah US 6,589,811, in view of Ding et al. US 6,737,300.

Sayyah discloses a method of forming a semiconductor device including forming an element (1) in a film (2) on a first substrate (5), transferring the element layer to a second substrate (20), and transferring the element layer to a sheet (12) (see figs. 3a-f and related text).

Sayyah does not disclose dicing the elements from the substrate or using a conductive adhesive to mount the elements.

Ding et al. teaches that protrusions can be formed on an element and that the element can be diced from a substrate and that the protrusions can be used with a conductive adhesive to electrically bond the elements to a structure (see figs. 13 and 14 and related text).

Therefore it would have been obvious to one of ordinary skill in the art to use the method of Ding et al. to form protrusions on the elements and use a conductive adhesive to bond the elements and also, to dice the elements, because it allows for a more reliable electrical connection between structures.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M. Picardat whose telephone number is 571-272-1841. The examiner can normally be reached on Monday-Thursday 7:00-5:30.
